

Evoq

Compact, high speed versatile capper.

**PACKSYS
GLOBAL**

A Member of Brückner Group

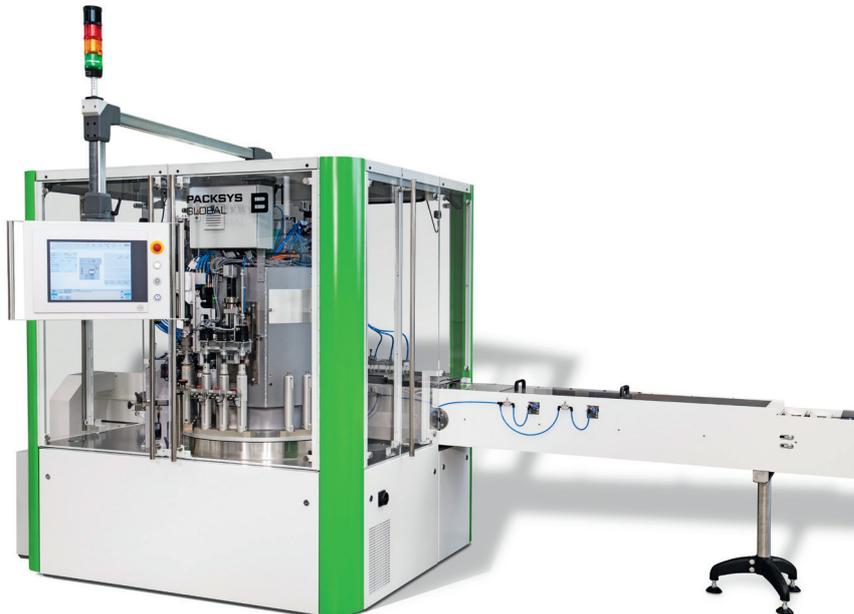

- 150 tubes/minute for all tube applications
- Handles both screw-on and push-on caps
- Single cap bowl for most caps saves on tooling cost and changeover time

The Evoq's unmatched compact design has an impressive range of application capabilities. All machine parts are easily accessible on this capper.

The design with a horizontal turret and modules operating from the center results in a very small footprint, with unique easy access to all process steps. Product changeover can be completed in less than 10 minutes.

The highly versatile Evoq can handle the following options:

- Oriented push-on application
- Membrane application (top seal)
- Processing of oval tubes and caps
- Oriented or 360° wrap labeling
- Special shaped caps
- Additional quality inspection
- Other applications upon request

Technical data

Tube diameter	19 – 63.5 mm
Tube length	60 – 240 mm
Speed	150 tpm
Technology	Cosmetic
Recommended for	Cosmetic
