

PackSys Global Ltd. - part of the Brückner Group in Siegsdorf Germany - is a world leader manufacturer of specialized equipment for packaging.

We design and build full lines for manufacturing and decorating extruded plastic tubes, laminate tubes, plastic beverage caps, aluminium tubes, aluminium screw caps and aluminium cans. Split on four specialized plants in Zürich, Bern, Bangkok and Rayong, our high skilled R&D and production team ensure constant development and integration of the latest technology in our machines.

Are creativity, excellent communication skills, a solid technical background in development and independency your strengths? Are you interested to work in a multicultural team? If yes you should contact us to be our new

Senior Mechanical Development Engineer R&D (m/f)

(Based in Rayong, Thailand)

In this role you are sub project leader in a small team jointly responsible for the successful improvement, further and new development of our various lines.

This will challenge you:

- You develop new assembly groups, machines and equipment for decorating aluminium cans, tubes and screw caps.
- You bring new ideas and transfer them into market-ready products within the budget and timeline.
- You monitor activities and tendencies on the market and find out their needs and requirements.
- You communicate, coordinate and organize depending on your instruction between our locations in Switzerland, Thailand and India as well with external partners.
- Occasional customer visits around the world.

You are characterized by:

- Take responsibility is a matter of course.
- You are a top motivated and ambitious personality.
- You have a technical education in machine engineering, automation or plant engineering on bachelor or master level as well as some years of work experience.
- The ability to use your theoretical and practical back ground to successful improve and develop existing and new product lines to customer's satisfaction.
- Excellent English and good MS-office skills as well as experience in 3D CAD applications complete your profile.

A many-sided, responsible position with attractive conditions of employment in an international and multicultural environment is waiting for you.

Convince us with your job application. It will be a pleasure for Ms Anchalee Srininngam (anchalee@packsysglobal.com) to get your letter of application preferably by email.
