

## Chuck chain upgrade for Jetliner

*Enhancing machine productivity.*

**Cost-effective upgrades mean low-risk migration to the more advanced and more widespread technology to stay competitive. PackSys Global ensures continued service support and availability of service parts.**

A fast tool changeover and low maintenance on a high-speed machine allows you to be more agile and profitable.

We offer chuck chain upgrade for the jetliner with following advantages:

- Exceptional savings in size-changeover downtime: an hour's work slashed to just 10 minutes
- Eliminates your weekly maintenance downtime on the chuck chain
- Higher speeds and lower heat generation due to an optimized chuck chain drive
- Easier maintenance over many years, made possible by the use of replaceable standard roller bearings
- All bearings are of shielded type for longer service life
- Use your existing plastic size parts and order the chuck body only

### Your Benefits

- Reduced downtime of the machine for tool changes by more than 80%
- Nearly zero weekly maintenance on the chuck chain
- Longer service life of the chuck chain
- Higher efficiency of the chuck drive motor

### Our proven expertise

Our qualified and regularly trained field engineers have performed overhauls and upgrades on a large number of PackSys Global machines, some of which were already 30 years old. We will live up to the trust you place in us.

### Get the latest equipment

Upon your request we offer new automation kits and solutions to bring the machine in line with the latest safety, productivity, and operating standards.

### Shorter payback period

You can recover the cost of your upgrade in as little as six months while you continue to derive the benefits of new technology for years to come.

### Retrofit package

Chuck chain (40 or 42 pcs +2 spares)

Chuck holder body (80 or 84 pcs +4 spares; for two size part sets using existing plastic size part inserts from old chain)

Safety sensor

Security disc (retrofit on ejection drum)

New extraction unit overspray suction chamber (tube lines only)

Repositioning of suction units back side (between loading and spray)

Rework or new tensioner bracket

New chuck drive belt roller support
