

MCDL side decoration

High quality side decoration of plastic and aluminum caps.

The MCDL is PackSys Global's high quality solution for side decoration of plastic and aluminum caps. Offering degreasing, base coating, and up to six color printing plus over-varnishing and two levels of speed, 270 caps/min. and 400 caps/min., this machine has fast become the standard for metal cap manufacturers around the world. Ideal for the challenging printing demands of the emerging wine markets and traditional liquor/spirits markets.

Process steps

Cap Sorting Unit	SDR series
De-greasing plant	DG series
Base coating machine	CMA
Drying plant (Base Coat)	DP series
Printing and Over-varnishing machine	PMA
Drying plant (Print & Over-varnish)	DP series

- High-end print quality – setting the industry standard
- Ideal for emerging wine and traditional liquor/spirits markets
