

Conversion to Power Panel T30 Series

Get ready for harsh industrial environmental condition with the modern and maintenance-free HMI panel

Our readiness, your advantage

The B&R Series Power Panel PP65 has been in the market for a long time. The availability of electronic components used in the various modules of this system is no longer secured, and therefore B&R has announced the discontinuation of this system.

We at PackSys Global always strive to give our customers a smooth and seamless transition in such situations to ensure minimum disruption and impact. We have created a retrofit kit for a seamless conversion to T30 Series of Power Panel. The retrofit can be integrated into existing systems and can extend the machines lifecycle as well add new functions which are offered by the new system.

In addition, we ensure continued service support and availability of service parts.

The retrofit kit with power panel T30 Series will contain standard software. This means an initial setup by our field engineers and equipment at plant is mandatory. Your investments are paid back while you continue to receive the benefits of new technology for years to come.

Our trained and qualified field engineers have performed retrofits on many PackSys Global machines, some of which have been in operation for over 30 years. We always live up to the trust you place in us.

Your Benefits

- State of the art
- Maintenance-free
- IP65 protection
- Remote support applicable

Machines that need upgrade

- MRA
- SLP
- REA
- KDP
- AMS
- CCM
- TET
- MSM

Conversion to Power Panel T30

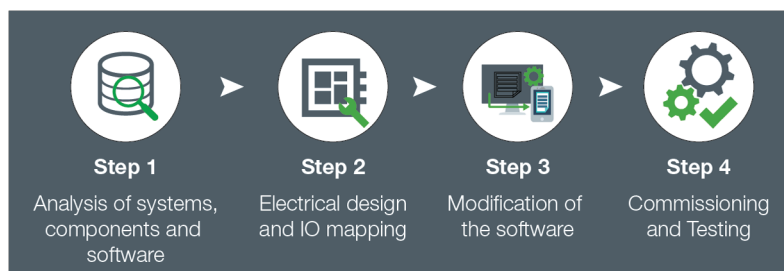

Improved features of T-30 series

The retrofit comes with enhanced features

- Get converted to state-of-the-art and cost-effective HMI
- Future benefit of plug and play of HMI
- Easy hardware maintenance & servicing
- They also have no hard disks, fans or batteries, which makes them maintenance-free
- Possibility of remote troubleshooting
- Modern controls, faster and more efficient
- The front of the panel provides IP65 protection, making these devices extremely well-suited for harsh industrial environments.

How the retrofit will be done?

To upgrade the system, the following steps are taken

Power Panel 65 (Discontinued)

Power Panel T30 Series

PackSys Global appreciates our business relationship and we are looking forward to your continued interest in our products and services, we are eager to support you with your future business requirements and needs.
