

# Retrofit Servomotors

Electrical Retrofit

PSS / 2022 / OCT / EN

## Your Benefits

- Ensures spare parts availability
- Ensures continued service support
- Preserve the value of assets

## The effect of Retrofit Servomotors

By ensure continued service support and availability of service parts, our retrofit extends the machine lifecycle.

## System consists of

- Cpl. set of new type Mini120 servomotors
- Required mechanical adaptionmaterial
- Mini120 software to control new servomotors

## Demand for continued Service

As you are aware has B&R announced the discontinuation of one of its older servomotors from series MSA and LSA-0. These series has been in use for quite long time and now its manufacturing came to halt. The spare parts may not be available anymore. We at PackSys Global always strive to give our customers a smooth and seamless transition in such situations to ensure minimum disruption and impact in production. All our new machines are now already equipped with the new type of servomotors from the latest B&R series.

## Requirement

Available for machines/lines equipped or upgraded with the B&R PLC X20 system. For the installation and commissioning onsite, a visit of one of our engineer's will imperatively be necessary.
