GLOBAL**

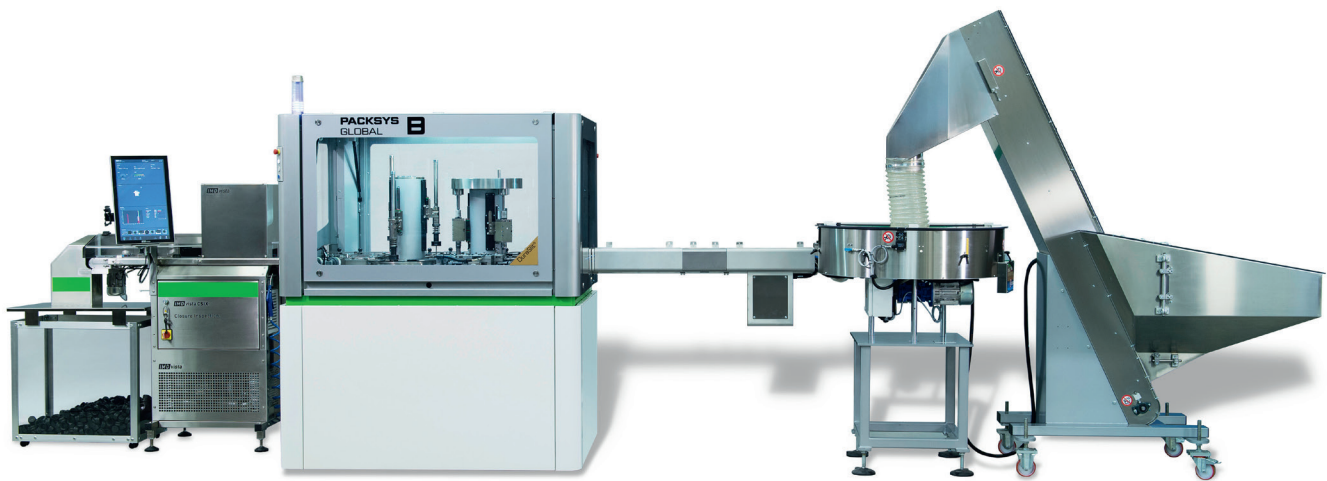

A Member of Brückner Group

The new TEM machine is a highly versatile machine with a wide range of uses for special markets as agricultural, pharmaceutical, beverages, food, beauty and home, chemicals, among others.

This versatile machine is easily integrated into any production line due to independent control and optional vision inspection system. The TEM gives flexibility in the process sequence thanks to its modular design for S/F or F/S of TE band. It also allows a large variety of cap dimensions, including sport caps.

- Always identical high precision slit geometry
- Flexible and cost-effective process sequence (S/F or F/S)
- Predictable BBF results
- No gap in slit line area

## Technical data

<b>Closure diameter range</b>	28 – 90 mm
<b>Closure length</b>	20 – 60 mm
<b>Speed</b>	From 50 up to 400 caps/minute
<b>Material</b>	PP, PE or HDPE

\* Other height, diameter or material on request.
