

Check-Up Decoration Machines

Enhancing machine productivity.

Your Benefits

- Maximize process reliability
- 10% discount on service parts recommended from a Check-Up
- Minimize risk of unexpected downtime
- Present customers documented proof of service

Planned and structured check-ups for your decoration machines minimize unexpected downtime, thereby maximizing your productivity.

Optimized production is essential for your profitability. PackSys Global provides a check-up service to ensure optimal productivity of your machines.

Trained field engineers inspect your PackSys Global decoration equipment efficiency.

The check-up includes the checking of mechanical & electrical parts. Further, we will optimize the machine parameters and settings for a even better machine performance.

This standardized procedure enables you to compare the machine's productivity year-on-year or against other machines.

Check-Up details

- Check and /or cleaning of the lubrication system
- Sensors functionality
- Check moving parts, wear parts, air and vacuum-circuits, etc. As well as electrical parts
- Optimize machine parameters and settings
- Preparation of additional repair work, if required
- Recommendations of preventive measures to secure continuous production flow
- Recommendations for optimal stock of spare parts
- Standardized procedures to compare machine productivity
- Documented proof of service and condition of the machine

Duration of check-up

The check-up requires a planned downtime of one day per machine. An additional half day is used to optimize the control settings and supervise the production process.

In consultation with the customer, PackSys Global will gladly offer to stay additional days for maintenance and process optimization.

Pricing

Our fixed rates enable better cost planning. In addition you will benefit from a 10% discount on service parts recommended from the assessment.

Our proven expertise

Our highly qualified and experienced field engineers are regularly trained. They have performed several checkups to complete customer satisfaction for many years.

Get the latest equipment

Upon your request we offer new automation kits and solutions to bring the machine in line with the latest safety, productivity, and operating standards.

Check-Up & Maintenance

During our check-up we will present you the latest upgrades in Soft- and Hardware, retrofits and options to get the most out of your machine giving to you, the best possible performance.
