

CartridgeMaster

High-quality bundling in a compact footprint

Precise bundling of cartridges made from a wide range of materials

The “CartridgeMaster” is the **compact** standard solution for **precisely bundling** cartridges, regardless of whether they’re made of plastic, thick-walled aluminum, or sturdy cardboard, with or without a nozzle.

Its space-saving design makes the machine perfect for inline integration, making sure that packaging quality is consistently high, even at high speeds. The flexibly adjustable setup ensures a wide variety of package shapes are handled reliably in minimal space – delivering maximum efficiency.

✔ What we offer you

98% process reliability

Controlled product handling ensures a smooth packing process where the materials are treated with care.

120 cartridges per minute
